

Hokigotchi

Little Hokie.
Big future.

A financial practice game
for student life

A plan meets real life

An illustrative student month

\$1,450

INCOME

\$1,240

EXPENSES

\$210

LEFT OVER

One \$850 surprise can rewrite the plan.

The opportunity: make the consequences visible before the decision.

Your habits grow Hoki

Progress comes from what you do with your plan.

Mystery egg

0 XP

Hokie hatchling

10 XP

Trail fledgling

150 XP

Campus champion

350 XP

Log an expense

+10 XP

Plan this week

+25 XP

New savings milestone

+25–100 XP

Chaos Mode: the laptop breaks

Which path would you choose?

A Buy new

\$850

B Refurbished

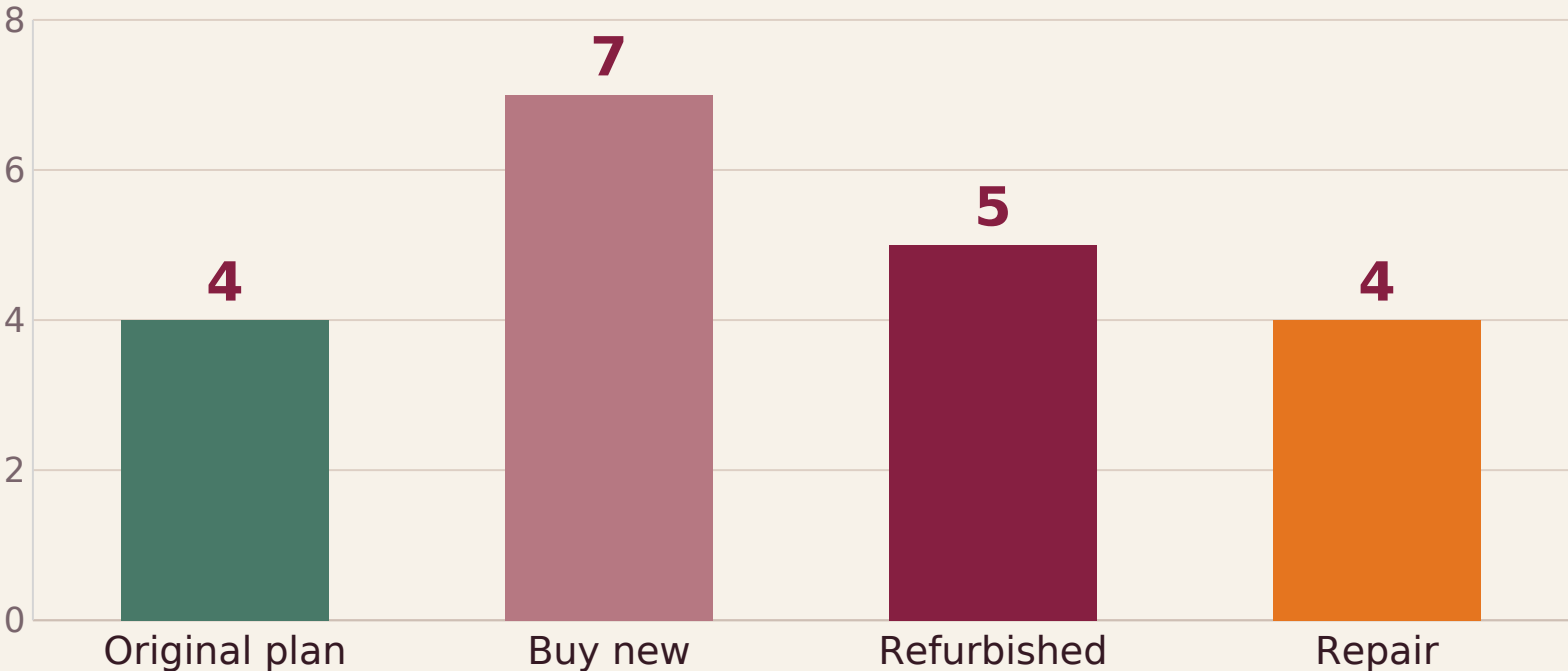

\$430

C Repair

\$180 if successful

One choice changes the timeline

Months to fund the same \$700 goal

2 months

**recovered with
refurbished**

compared with
buying new

Sample projection. \$210 monthly surplus restores the \$800 reserve first.
Repair assumes a successful \$180 fix. Goal funds remain part of total cash.

Banking data, a game you can trust

Capital One Nessie

Simulated checking and savings for banking practice.

Next.js + TypeScript

Budget calculations, game rules and the Chaos simulator.

Supabase

Email-code accounts, private saves and an opt-in weekly league.

Rankings show nicknames and habit scores. Financial details stay private.

The prototype and the next chapter

WORKING PROTOTYPE

Weekly plans and expense logs
Savings milestones and Hoki growth
Cloud accounts and opt-in rankings
Interactive Chaos encounter

NEXT BUILD

More banking activity feeds
Personalized scenario generation
Campus reward partnerships
A broader student pilot

Coupons, cashback and cash rewards remain previews.

Hokigotchi

A money habit
you want to
come back to

Plan your week. Grow your Hoki.
